

## APPLE VIDEO EXPERTS WORKSHOP AND SEMINARS

You may have heard of Final Cut Pro, but what about Motion? Or Logic Studio, or Cat DV? Apple are the tops for expandability. So – how far could you go? Who are the local experts? What's coming next? You've got a chance to find out at our **Bristol Media Show & Tell Special**, co-ordinated by Quad Logic, and with a team from Apple, Films@59, Digital Village & Oxygen DCT. The event takes place on **Thursday March 27th** at Java Bar, 9 Park Street, Bristol BS1 5NF.

What's on offer? From 4pm, there's a whole raft of drop in sessions:

Editing – Final Cut Pro 6 with Dilleesh Koraya

Grading and Finishing, with Chris Short from Films@59

Graphics – Motion 3 with Richard Atherton

Sound Design – Logic Studio with Al Lethbridge and Will Slater

Asset Management – Cat DV with Kevin Duggan, Apple Consultant

Networking – Xsan with Ken Bell from Quad Logic

LCD Grading Monitors with Steve Hathaway from Oxygen DCT

**7 workstations, 7 experts – a lot to discover!**

From 6.30 until 8, we will be joined by Al Mooney from Apple UK with an update on their new products, plus a presentation on delivery to the web by Simon Walker (Apple Trainer) and high-end grading. It's a chance to meet the local talent and see how your business can benefit. And you could win an iPod in our prize draw. Places are limited and we expect a high take-up so to be sure you get your invite (which also entitles you to a drink and nibbles during the evening), email [finalcut@quadlogic.co.uk](mailto:finalcut@quadlogic.co.uk) now.
